### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to an apparatus having a control means for controlling the display and storing of the images, classified in class 358 , subclass 909.1.
- II. Claims 25-33 , drawn to an apparatus for processing the images into a first format and a second format, classified in class 386, subclass 131.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus of claims 1-24 using a control means for controlling the display and storing of the images and the control means is not required by apparatus of claims 25- 33 and the apparatus of claims 25- 33 using a conversion means for converting the images into first format and a second format in accordance with a first recoding mode and a second mode that is not required for the apparatus of claims 1-24. The subcombination has separate utility such as the apparatus claims 1-24 can be operated independent from the apparatus claims 25-33 .

Art Unit: 2615

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T NGUYEN whose telephone number is (703) 305-4775. The examiner can normally be reached on 8:30AM -6:00PM.
